ACCUPLACER Testing Sites 2014-15

To improve reporting for 2014-15, all high schools will be considered ACCUPLACER testing sites. This change requires corporations that tested under one testing site last year to have an individual testing site for each high school this year.

To assist with this transition, the College Board has created an individual testing site for each high school. Site manager log in credentials are being generated for each high school and will be sent to the CTC of each school corporation. CTCs may add additional site managers and proctors as needed.

CTCs will be able to access data for each high school and combine the data into one report for corporation reporting purposes if needed. The College Board contact for assistance is Deborah Anderson, and her email is: danderson-NONEMP@collegeboard.org.
